

HI !
I'M Dipta Dhor
Programmer || Cyber Security Specialist

I am an enthusiastic programmer and cybersecurity expert with a deep understanding of various programming languages and security protocols. My expertise spans across multiple domains, ensuring robust and secure code development.

Portfolio

Encryption System

The Encryption System project aims to develop a user friendly encryption system that provides secure communication by implementing two encryption algorithms: Caesar Cipher and Arceus Encryption.

Bank Management System

The Bank Management System project aims to develop a user-friendly system that manages bank operations including account management and transactions securely and efficiently.
